# Hello and Welcome to the
Anarchist Federation of Cyber Communes

1) What is this?
This is a place to unite. To come together to figure out how to build a better world, and to start building it. Share skills, pitch projects, exchange ideas, and so on.

2) What is a cyber commune?
For practical purposes, you can think of a commune as a project, a collective, a gathering space, an affinity group, or whatever works for your needs and/or purposes.

We use the term cyber because we primarily operate on the internet, but also because each commune conceptually operates as a cybernetic entity.

We refer the reader to our internal documents for a more theoretical treatment of the cyber commune.

3) Where are documents stored?
We are using Forgejo to store our documents. (url: http://server.af2c.org:3000/AF2C)

4) Organization on Matrix

We are using Matrix to discuss and organize. Some of the rooms in our Matrix space correspond to communes, while others (such as 'general', 'brainstorming', and 'theory' function as shared discussion spaces to foster new ideas.

5) List of cyber communes

Operations Communes
- System Administration
- Social Media
- Opsec
- Finance

Creative Communes
- Translation
- Graphic
- Text
- Propaganda making
- Infographics and data visualisation
- Development
- Web-Dev
- Video
- Mutual Audio

Federated Communes
- Reading Theory
- Well 4 Ward
- Anar-Wiki
- Radical libraries

6) Visualization of Communes

Below is a visualization of how the communes listed above are organized. The grey circle represents private AF2C space. Communes outside the private space are existing federated communes (Well4Ward, Radical Library, Reading Theory), or potential federated communes (art collectives, other podcasts, writers collectives)
